

Finding *Joy, Health, & Hope* for All

FREE EVENT both LIVE and ONLINE

Thursday, September 16, 2021 at 7 PM

Steven A. Salt, CSB

Christian Science Board of Lectureship

Event sponsored by
First Church of Christ, Scientist
1736 Cleveland Rd.
Wooster, OH

Who couldn't use a bit more *Joy, Health, & Hope?*

Exploring how things work, discovering dynamic relationships, observing unapparent connections, and applying the knowledge gained to make sense of it all...has been the impulse of Steven Salt's life.

As a youngster, Steven designed, engineered, and built cities of cardboard, electrified them, and served as city manager to imaginary families and workers. Growing up, he took on more and more complex projects—models of bridges, elevators, and rockets. Learning by doing was his method of choice.

A degree in education from Ohio University and a deeper plunge into the workings of life through Christian Science, developed his strong relationship to God and community. Over time he built a solid framework for understanding and valuing the true nature of things.

Don't miss this inspiring talk where Steven Salt generously shares his thoughts for finding and developing joy, health, and hope in your own life.

Join us in person at
First Church of Christ, Scientist
1736 Cleveland Rd.
Wooster, Ohio

or Join the meeting online at
